Femdel provides organizations with an integrated suite of managed IT services that supports the total life cycle of IT infrastructure. Femdel works from planning and design to implementation, operations, security, and maintenance. As a full-service managed services partner, Femdel can work with you from the very beginning of the project from design to deployment. Femdel can also operate your entire IT infrastructure true, including networks, servers, help desk, desktop systems, mobile devices, peripherals, business systems, application development and more.

Customer service is an integral part of the Femdel business model. We pride ourselves with an ongoing trend of delivering timely and innovative solutions. We focus on ongoing, meaningful customer engagement using techniques such as relevant and customized Earned Value Management (EVM) reporting. EVM reporting keeps customers informed on the scope, schedule and cost associated with Femdel's work performed. It also enables the customer to track value earned on the work contracted to Femdel.
